Cell computer & WSM software upgrade

System 3R

Cell computer & WSM software upgrade

– ensuring your production cells remain reliable well into the future

Have you considered?

- System 3R's cell computers are extremely important for production cell reliability. All our cell computers are thoroughly tested to work with System 3R software and hardware.
- System 3R's cell computers are adapted for industrial use and must not be compared with ordinary consumer computers.
- As of April 2014, Microsoft is stopping maintenance and support of WIN XP. This can lead to future problems with upgrades and drivers.
- When installing new cell computers with WIN 7, CellManager will need to be upgraded.
- WorkCenter and CellManager are constantly being expanded with new, useful functions.
- New software and hardware minimize the risk of future production losses in the production cell.
- If software and hardware are replaced simultaneously, System 3R offers a package solution at a discounted price.

Software and hardware upgrade package

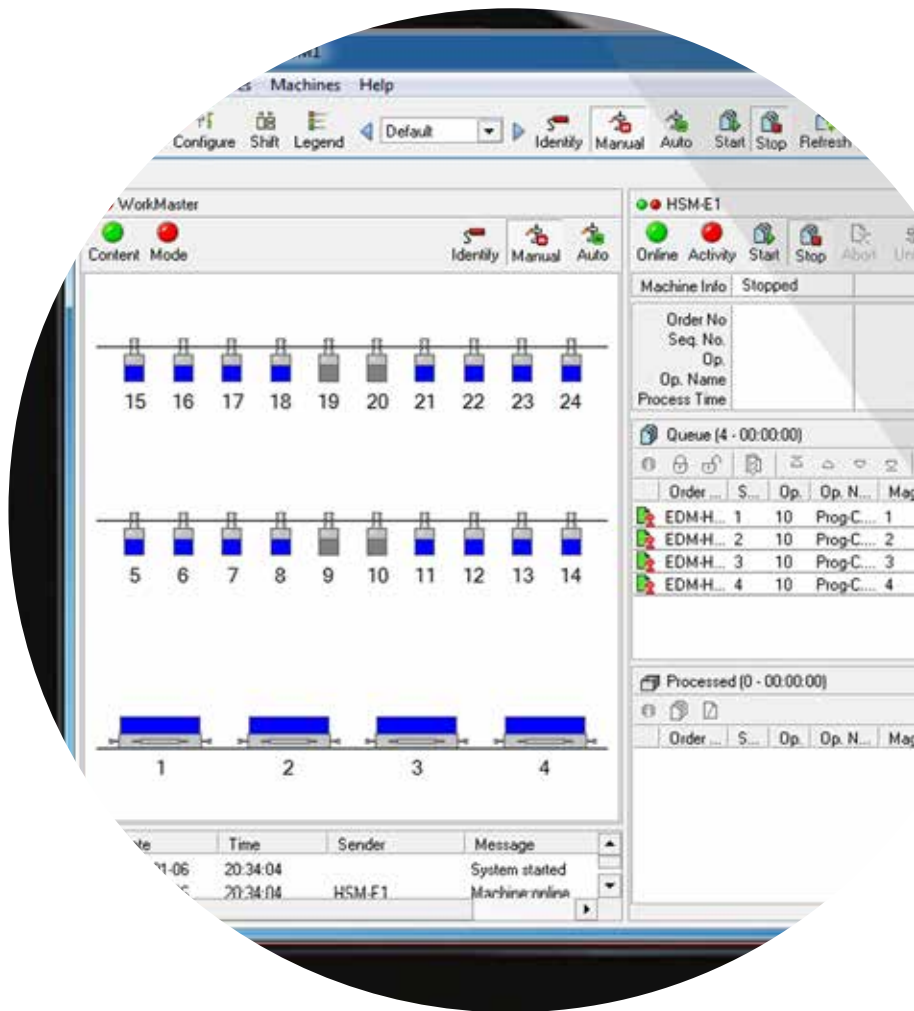

- New cell computer with latest operating system and associated components.
- Latest version of CellManager installed.
- Experienced service specialists carry out the replacement smoothly and rapidly for minimum possible downtime.
- The package includes all components for the installation.

Benefits

- + Access to the latest functions in System 3R's software.
- + New software and hardware ensure maximum possible production cell reliability.
- + Support for the latest operating systems from Microsoft (WIN 7, WIN 8 and Windows Server 2008).
- + The upgrade package at a discounted price is available if cell computer and software are upgraded at the same time.

For more details about your particular upgrade, please contact your local System 3R representative, www.system3r.com.

System 3R's Customer Services

- Ensuring productivity.
- Reducing running costs and wasted parts.
- Maximizing the return on your System 3R investments.
- Extending the service lives of your System 3R equipment while maintaining optimum precision.
- Ensuring robot cell safety satisfies present machine directives.

System 3R's Customer Services is uniquely positioned to help you maximize the availability, value, precision and productivity of your System 3R equipment. Our cost-effective, customer-centric and expert services put your success at the center, ramp up your productivity and ensure predictable, uninterrupted uptime. System 3R's service engineers are your expert partners for a wide range of success-triggering services.
